JIWOOK Bowling

The dorm students are very busy with studying but on the weekends we take time off to do some activities. This month students went bowling. They were not competitive as you can see from the score, but they had laughs and fun. Although the students wouldn't know the difference between spinning or shooting straight or the importance of having the same form every single time, going bowling was a pleasant experience for them.

If there are more students coming next year, the dorm students hope to make some teams and play bowling in a team match. It is always more fun to have more people. All in all, it was a good day of relaxation and bowling.

# NEW YORK CITY TOUR

▲ At NYU Stern School of Business

The Conwell-Egan dorm students went to New York City this month for college tour. At first, the students started the tour at New York University. The university is a four-year private college in New York City. The student body is quite diverse, and the school is known to be open-minded and liberal. The students liked the campus that is located in the middle of the city.

NYC

The students also went to Washington Square Park, Central park, and Time Squares. They had a lot of fun together being fascinated by the city. They also visited Columbia University, which is a private IVY League university located in New York City. Columbia is the oldest higher education in New York and the fifth-oldest institution of higher learning in the United States.

Hi **Jaehyun**, this is your interviewer **Hyowoo**!  
How are you today?

I'm good! Thanks.

Great! Let's dig in.  
First question: **What do you like about the dorm?**

I find the Friday weekly meetings very helpful since the supervisors inform me about colleges during the meeting. Above all, however, the dorm helps us to learn the value of community life. Because there are currently not many students living in the dorm, it is very quiet, but it's nice that I can get to know them more.

True! I believe that the dorm is a great community for students where they can learn how to care for others.  
Next question! **What is your favorite subject in school?**

My favorite subject is Physics. Dr. Burg is a professional teacher who knows how to weave a good story into the session lesson. I enjoy tackling difficult problems and learning new concepts.

Physics sounds like a fun subject! I would consider taking it next year. Here is your last question!  
**What was the most memorable activity in the dorm?**

I would say the trip to New York. I bought some souvenirs and ate delicious cookies. Also, New York is one of the most iconic cities bustling with life. It is the city that never sleeps.

# STUDENT INTERVIEW

**&** RIAN  
JIWOO

Hi **Rian**! This is your interviewer **Jiwoo**.  
Thanks for being my interviewee! Are you ready for the interview?

Yes I am!

Alright! Let's get started.  
First question! **What is your favorite thing about the dorm?**

I like the meals provided at the dorm, and the college tour we go every month. Also, I love it when we go to city tours because there are many places to see and photography ideas.

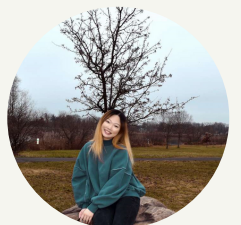

I love the college tours too! I'm looking forward to our next tour.  
Next question: **What was the most memorable activity in the dorm?**

I enjoyed the Princeton University tour we went on last November. The weather was perfect, and the antique buildings were beautiful. They seemed very old, but I loved the old style.

I remember that tour! It was such a wonderful day.  
Last question! **What is your favorite subject in school?**

My favorite subject is Pre-calculus. It is a little challenging for me, but it does not stress me out; I enjoy the challenges of the subject. Pre-calculus is also the subject that I get the highest grade among which I take.
